

Metronidazole Pledget

Stage II

KFP suggested a patent be filed to cover use of metronidazole solution in pledget, pad, and dab-o-matic formats. This position would be critical if metronidazole is approved for an acne indication.

KFP File patent application for this concept.

10 December 96

After reviewing Stage I, NPC decided to move this project to Stage II.

Concept: Metronidazole solution in a pledget format would be a unique delivery system in the market place for this active. Efficacy of this delivery system in rosacea would be needed to support an NDA filing.

KFP Review patent options for this concept.
